

# PORTABLE GRAVITY-FED EYEWASH STATION

## #5135

Lack of an emergency eyewash station is one of the top OSHA citations. Protect employees as required by law and guard against personal injury claims.

This low profile emergency eyewash station hangs just 10 inches from the wall, making it perfect where space is a consideration.

This low maintenance unit is constructed of a highly visible, bright green polyethylene making it easy to find and very durable.

The single action, pull-down activation tray remains in the up or closed position when not in use, protecting the spray heads from contamination and eliminating the need for an extra dust cover.

Includes wall mount bracket, inspection tag & one bottle of water preservative (P/N 5136) to keep potable water clean up to six months. SAS Safety recommends changing the water every 90 days.

- One hand operation
- Gravity fed
- 15-minute flow time
- Portable
- No plumbing required
- Low profile
- Compliance - ANSI Z358.1-1998

Notice: All models shown meet ANSI Standard and OSHA rules and regulations relating to this type of product. Units should be tested regularly. Continued product improvements make specifications subject to change without notice.
